3

Management of proceeds

Green Bond Register

The projects will be subject to a detailed control through their inclusion in a specific data base (green bond register) for monitoring their evolution. The green bond register will be dynamic since eligible projects will mature or might become ineligible and new eligible projects will be included in the register.

It will be constructed and maintained by the ESG Working Group on quarterly basis

It will include relevant information of the bonds issued and details of the Eligible Green Projects (needed to assess the eligibility criteria and to calculate the environmental impact)

An excess of eligible projects will be maintained to ensure compliance with the requirements of the use of proceeds.

Green Bond Register principles

Unallocated proceeds to eligible projects will be held in accordance with Unicaja's normal liquidity management.

Unicaja commits to fully allocate the proceeds of any green bonds issued under this Framework within the next 36 months after issuance date

Any project attached to a green bond issued that no longer meets the requirements will be replaced within a maximum of 12 months

Methodologies of general acceptance in the market will be used for the calculation of the environmental impacts associated with Unicaja's green bonds.

Green Bond Framework: (4) Reporting

4

Allocation Report

- It will be updated in the event of any material changes affecting Eligible Green Projects.
- It will include the amount of the net proceeds of the Green Bond.
